

Traffic Safety

Engineering Action Team

TO: RTFs, MPOs and Safety Partners

The Traffic Safety Engineering Action Team (TSEAT) is looking for your participation!

Who are we? The TSEAT is a part of a network of ad hoc committees comprised of local, state, federal, and private partners, working in collaboration with the Governor's Traffic Safety Advisory Commission (GTSAC) to identify safety challenges and comprehensive solutions. The result of these efforts will support achievement of the mission, vision and goals identified in Michigan's Strategic Highway Safety Plan (SHSP).

What do we do? Promote infrastructure safety through outreach and communication, promote and sponsor research on infrastructure safety, identify and resolve safety issues, promote the testing of new countermeasures and help broaden the use of currently accepted and proven countermeasures. We also promote and foster relationships for funding opportunities.

The TSEAT's focus is intersection and lane departure safety – find out more about our action plan at http://www.michigan.gov/documents/msp/TSEAT_Action_Plan_090613_FINAL_Reviewed_01016_438678_7.pdf

Why should you participate? We need your help! The more people talking about and working towards infrastructure safety for intersections and lane departure crashes, the safer our roads will be. We need your help to achieve the mission, vision and goals identified in Michigan's Strategic Highway Safety Plan.

Contact either of our co-chairs with any additional questions. Contact information and information on upcoming meeting dates and locations can be found on our Action Team's website at http://www.michigan.gov/msp/0,4643,7-123-64773_41646-145624--,00.html

We hope to see you at our next meeting!
